# LETTER FROM THE MANAGEMENT

We've always been contemplating a model that can level the playing field in healthcare, reduce the pressure on central level public hospitals and at the same time bring primary care to more people.

It must be a facility where in-depth expertise is relied upon for timely diagnosis and intervention in emergencies.

It must be a facility where each and every staff has excellent behavior and dedication to work and sincerity in their assigned tasks, upon whom Customers can always rely in case of needs.

TRUE  
JAPANESE  
HEALTHCARE  
FOR  
VIETNAMESE

It must be a facility equipped with modern equipment where not early signs of a condition or disease will be overlooked.

With this in mind, in 2013 we opened the first Emergency Medical Services (EMS) clinic in Kagoshima, Kyushu, Japan, pioneering the 24/7 emergency model that serves 365 days a year. EMS clinic does not plough a lone furrow but is connected to various hospitals to deliver full support to Customers in case hospital transfer is required. We also offer second opinion services if Customers want to talk to senior doctors across Japan.

In this manner, EMS clinics have established their presence across the country, particularly on sparsely populated localities to address the healthcare gaps.

For nearly 10 years now, the lights of EMS clinics have never gone off as our professionals work hard every day to improve the quality of community healthcare, with the target to gradually become a healthcare system trusted by the people and appreciated by the Government.

On the back of achievements that EMS clinics have gained so far, we want to introduce this successful healthcare model from Japan to Vietnam by bringing to existence T-Matsuoka Medical Center. With our resources, we team up with Japan's premier doctors and hospitals to bring true healthcare experience to Vietnamese Customers.

We vow to contribute to a reliable medical system for Vietnamese people!

*Yoshinori Matsuoka*  
Matsuoka Yoshinori

T-Matsuoka Medical Center is a brand invested in and operated by the Emergency Medical Service (EMS) Medical Group, Japan, bringing the true medical experience, to become a fulcrum for the health of customers.

# An icon of Vietnam - Japan diplomatic ties

*Not just a Japanese Standard Medical Center, T-Matsuoka Medical Center is also an important icon of Vietnamese - Japanese diplomatic ties in the field of medical cooperation, on the occasion of the 50th anniversary.*

The Standing Deputy Prime Minister Pham Binh Minh appreciated EMS Group's efforts to invest in and build the first T-Matsuoka Medical Center in Hanoi with a huge investment, advanced facilities and equipment, contributing to the promotion of medical cooperation between the two countries as well as enhancement of the quality of healthcare services in Vietnam.

Chairman of the People's Committee of Hanoi - Tran Sy Thanh said that EMS Group has been on the right track with its new project in Hanoi, and he believed that the Medical Center, once launched, would effectively serve the needs of the people for general healthcare services, cancer screening, and application of stem cell technology, etc.

*That T-Matsuoka Medical Center is established in Hanoi marked a new milestone in the close diplomatic ties between Vietnam and Japan, especially in medical cooperation.*

**H.E. YAMADA TAKIO**

Ambassador Extraordinary  
and Plenipotentiary of Japan  
to Vietnam

*The existing medical equipment system owned by T-Matsuoka Medical Center in Hanoi is more advanced and modern than that of many medical facilities in Japan.*

**Mrs. KATO KOKO**

Former Advisor, Chief Cabinet  
Secretary of late Prime Minister  
Shinzo Abe, Executive Director  
of the National Congress of  
Industrial Heritage

# SERVICES

## NINGEN DOCK PHYSICAL EXAMINATIONS

Just like a ship that needs annual maintenance after having navigated through harsh weather conditions during long voyages at sea, people should have regular health screenings to enable detection of abnormalities at a very early stage before the symptoms even show up. Physical examinations following Japanese renown Ningen Dock with 05 outstanding features:

### COMPREHENSIVE - THOROUGH - IN-DEPTH - EFFECTIVE - ACCURATE

enable early detection of up to **500 syndromes**, conditions, and disorders that may develop into a condition for which effective treatment and control methods are available (number of diseases according to FDA)

The final results will be consulted by a professional council of premier doctors from Japan and Vietnam, who will provide in-depth advice, recommend thorough examinations upon detection of any dangerous abnormal signs or hold multi-subspecialty consultations if cancer is suspected. Not only conducting examinations, we also accompany Customers throughout their health monitoring, as well as advise them on long-term proactive health care solutions and development of a scientific lifestyle to avoid all risks of diseases.

**Ningen Dock** is the Japanese **QUINTESSENCE OF PREVENTIVE MEDICINE** and is being deployed with all sincerity for the health of Vietnamese people at T-Matsuoka Medical Center.

# PRIVATE DOCTOR

## Gia đình và Doanh nghiệp

- **Family private doctors** will learn about the health status and lifestyle of family members to provide an appropriate proactive health care plan, and help build healthy habits to reduce health risks. In case treatment is required, the doctors will follow up and send reminders to ensure the customers will benefit the most from treatment.

- **Corporate dedicated doctors** will take care of and advise on health issues in your Corporate, and work to raise your employees' awareness of proactive health care. This is considered as a healthy benefit for employees, aimed toward an ideal business environment.

## SELECTIVE MEDICAL EXAMINATION

Get seen to by Japanese doctors & experts  
Second opinions

We understand that Customers expect a thorough and honest explanation for their symptoms when they come to T-Matsuoka Medical Center. So, our team of Japanese and Vietnamese doctors are ready to take their time to listen and understand each Customer's health issues to make a comprehensive assessment. If need be, we assist and support Customers to obtain a second opinion with a team of doctors from nearly 40 leading hospitals in Japan to ensure a highly accurate diagnosis.

# WORKPLACE HEALTH CHECKS

Understanding businesses' responsibility for employee welfare, we are pleased to offer workplace health check services that are not only limited to examinations and diagnosis but also followed by us accompanying businesses in the monitoring, management of and provision of advice on the health of executives and employees. We will advise on and provide customized annual health check programs, ensuring the rigor in all procedures up to Japanese standards so as to meet the high criteria of international corporations, companies, and businesses, etc.

## SUPPORT WITH EXAMINATION & TREATMENT IN JAPAN

If required, we will support Customers to connect to a suitable hospital in our network of nearly 40 General and Specialized hospitals across Japan. Examination and paraclinical results obtained at T-Matsuoka Medical Center are recognized by partner hospitals, so Customers don't need to have their health checked again for treatment in Japan. These input results are adequate for Japanese doctors to design appropriate treatment regimens in a timely manner.

Once returning to Vietnam, Customers can regularly monitor their health at T-Matsuoka Medical Center and talk to doctors from Japan via the tele-health system.

The in-depth expertise, and high-quality services and technologies at T-Matsuoka Medical Center help optimize Customers' medical examination and treatment provided in Japan in terms of time and cost.

# PROCEDURES

## TRUE JAPANESE PROCEDURES

Elevated meticulousness and care is necessary for fields where human health is involved. That's why we always strictly follow all steps in the examination process, engage multiple subspecialties and spend more time on every detail to analyze Customers' health conditions so that no abnormalities will be overlooked, even the smallest one without the abuse of testing orders.

We also understand that getting medical treatment and examination has never been a truly pleasant experience. Anxiety, confusion and hesitation may cause many Customers to delay their medical visits. Putting themselves into Customers' shoes, our doctors will spend more time listening and clearly explaining to Customers; and our Technicians and nurses will carry out each procedure with prudence and care to ensure Customers' comfort; while the customer service team understand that it is important to pay attention to every detail so that Customers see that they are always taken care of.

We believe a meticulous process and a dedicated medical care service carried out in the true spirit can make life-worthy changes.

# TECHNOLOGY

## THE MOST STATE-OF-THE-ART MEDICAL EQUIPMENT FROM JAPAN

Echelon Smart MRI System

Going beyond old-fashioned technologies, T-Matsuoka Medical Center harnesses the Synapse 3D software to provide comprehensive and detailed color imaging of body organs in 3D format, enabling doctors to accurately observe injuries. Along with that, the artificial intelligence in the software is also capable of identifying the smallest anomalies that are easily overlooked by human readers, thereby minimizing the possibility of errors in diagnosis and improving early detection of disease for effective treatment.

Scenaria View CT System

## REAL-TIME IMAGE STORAGE & TRANSMISSION TECHNOLOGY

T-Matsuoka Medical Center is equipped with a PACS system capable of transmitting live images with absolute image quality in real time, ensuring effective second opinion consultations with doctors in Japan. Thanks to this, doctors can order scanning and imaging notwithstanding the geographical distance in special cases.

# SPACE

With a focus on enhancing customers' experience, we have our clinic space designed and cared for in every detail to make sure that customers can feel comfortable despite their internal worries and insecurity about their health each time they visit T-Matsuoka Medical Center. Each specialized room has a private design to allow customers and doctors discuss customers' health status in comfort.

Through some highlights typical of the "sunrise" country such as Mount Fuji, cherry blossoms in the lounge, corridors, imaging rooms, etc. T-Matsuoka Medical Center also conveys a part of Japanese dedicated service spirit which is hidden in such wordless design language.

# HEALTHCARE PARTNERS

Nearly 40 leading General and Specialty hospitals in Vietnam and Japan are prepared to admit customers of T-Matsuoka Medical Center for treatment if specialized care is needed.
