TRUE JAPANESE PROCESS & SERVICES

Elevated meticulousness and care is necessary for fields where human health is involved. That's why we always strictly follow all steps in the examination process, engage multiple subspecialties and spend more time on every detail to analyze Customer's health conditions so that no abnormalities will be overlooked, even the smallest one without the abuse of testing orders.

We also understand that getting medical treatment and examination has never been a truly pleasant experience. Anxiety, confusion and hesitation may cause many Customers to delay their medical visits. Putting themselves into Customers' shoes, our doctors will spend more time listening and clearly explaining to Customers; and our Technicians and nurses will carry out each procedure with prudence and care to ensure Customers' comfort; while the customer service team understand that it is important to pay attention to every detail so that Customers see that they are always taken care of.

We believe a meticulous process and a dedicated medical care service carried out in the true spirit can make life-worthy changes.

THE MOST STATE-OF-THE-ART MEDICAL EQUIPMENT FROM JAPAN

SYNAPSE 3D

Going beyond old-fashioned technologies, T-Matsuoka Medical Center harnesses the Synapse 3D software to provide comprehensive and detailed color imaging of body organs in 3D format, enabling doctors to accurately observe injuries. Along with that, the artificial intelligence in the software is also capable of identifying the smallest anomalies that are easily overlooked by human readers, thereby minimizing the possibility of errors in diagnosis and improving early detection of disease for effective treatment.

REAL-TIME IMAGE STORAGE & TRANSMISSION TECHNOLOGY

T-Matsuoka Medical Center is equipped with a PACS system capable of transmitting live images with absolute image quality in real time, ensuring effective second opinion consultations with doctors in Japan. Thanks to this, doctors can order scanning and imaging notwithstanding the geographical distance in special cases.

T•Matsuoka Medical Center
